

**MOORPARK CITY COUNCIL  
AGENDA REPORT**

**TO:** Honorable City Council

**FROM:** Teri Davis, Senior Management Analyst 

**DATE:** March 4, 2011 (CC Meeting of 3/16/11)

**SUBJECT:** Consider Proposed Water Rate Increase Being Considered by the Ventura County Waterworks District Board of Directors

**BACKGROUND**

In October 2010, the Ventura County Waterworks District No. 1 (District) issued a Notice of Proposed Water Rate Increase (Notice) to all water users. The 10% increase, scheduled to be heard by the Ventura County Board of Supervisors (Board) on December 14, 2010, was described as passing through a recent 10% increase from Calleguas Municipal Water District (Calleguas), the agency importing water to Ventura County. Because only about 72% of the District's water related expenditures are for water supply, staff felt that the 10% increase being considered by the District should be for 7.2%. Also, the Notice stated the 10% increase would be effective on billings dated on or after January 1, 2011.

This matter was discussed at the December 1, 2010 City Council meeting and Council directed staff to prepare a protest letter to the Board requesting a change in the implementation date to affect water sold on or after January 1, 2011. At its December 14, 2010 meeting, the Board voted against the 10% increase and requested District staff to return to the Board in January to discuss the ramifications of denying the 10% increase.

At the January 25, 2011 Board meeting, District staff stated that the budget would be in a deficit, upwards of \$200,000, by the end of Fiscal Year 2010/2011 without an increase in water rates. The Board directed its staff to return on February 8, 2011 with a recommendation for a new water rate increase proposal with and without changing the tier allocation. As a result, on February 17, 2011, the District issued a new Notice of Proposed Water Rate Increase (2011 Notice). The 2011 Notice proposes a 12% water rate increase and a tier allocation adjustment.

**DISCUSSION**

Previously, City staff felt the proposed 10% increase did not appear necessary because Calleguas implemented a 10% increase to the District for purchased water which is only about 72% of the budget. City staff felt the District should be able to forego an increase on the balance of its expenditures. However, after the January 25, 2011 Board meeting, staff

met with District staff on three separate occasions to discuss the methodology, calculations, and strategies used when determining the proposed water rate increase. Mayor Parvin and Supervisor Foy, as well as staff, attended a meeting of the District's Citizen's Advisory Committee (Advisory Committee) on January 27, 2011. At that time, it became clear that the District was spending down its Rate Stabilization Fund (RSF) to stabilize rates and without a rate stabilization increase the RSF would be depleted by June 30, 2011. At this meeting, the Advisory Committee was reminded of its policies to maintain a balance of \$660,000 in the RSF by year end of each fiscal year (6/30). It also became clear that the setting of rates on a calendar year basis due to the timing of rate setting decisions by Calleguas and the Metropolitan Water District of Southern California (MWD) contributed to the depletion of the RSF and misunderstanding between City and District staff. Through these detailed discussions, the explanations, provided by the District, that were unclear in December became clear and are now understood by staff. An increase in water rates that is at a percentage higher than that of the District's water related expenditures seems unavoidable if the District is to maintain its RSF at around \$660,000.

It is worthy to note, that potential alternate future water resources were also discussed at these meetings. Presentations at the Board and Advisory Committee have made it clear that the increase in water costs by MWD and Calleguas are a result of not only reduced supply and related price increases but deferred maintenance of facilities and the need for new capital investments by both entities. These latter factors have added to the projected rate increases expected over the next decade. All parties agreed alternate future water resources were vital to the community and may serve as a long range cost modifier for future water rate increases.

The City's December 2010 protest letter to the Board requested a delay in implementation allowing water users to adjust water usage prior to facing higher costs per unit of water used. The implementation date under the October 2010 Notice, if it had been approved by the Board, would have been effective on billings after January 1, 2011 which seemed to affect water purchased during or before December 2010. As previously stated, this increase was not approved. The City is now in receipt of the 2011 Notice stating that a 12% increase will take effect in May 2011, if approved by the Board. A 12% increase in rates implemented on May 1, 2011 would be the equivalent of an 8.4% annual increase.

The City may choose to protest the 2011 Notice in which case the City would prepare a letter to the Board prior to the public hearing scheduled for 10:30 a.m. on April 5, 2011.

For residents, the 12% rate increase could result in a greater than 12% annual cost based on the proposed changes to the tiers. For most users, it will require an approximate 20% use reduction just to cap their increase at 12%.

Staff recommends not protesting the rate increase but suggesting that the Board delay implementing the proposed tier changes until at least January 2012 to allow residents time to prepare for the changes since most of their savings will probably have to be achieved on exterior water use. This should be accomplished by further efforts by the District to promote conservation including consideration of financial incentives.

### **FISCAL IMPACT**

Without further reduction in water use, the proposed 12% rate increase would cost the City approximately \$18,000 in parks and landscaping subsidies from the General Fund and approximately \$12,000 in self-funded landscape assessment district zones for the affected two months of Fiscal Year 2010/11. Because of ongoing conservation efforts, the City should still spend within budget. Based on the current fiscal year budget, the annual cost increase is estimated to be \$108,000 from the General Fund and \$72,000 in self-funded landscape assessment district zones for Fiscal Year 2011/12. City staff is continuously working on water conservation efforts and staff is optimistic that additional savings may be achieved. In addition, in the near future, staff will present a report to Council addressing additional measures to reduce water use for landscaping.

The tier allocation adjustment will result in an unknown increase to the water rates paid by the City in recent years. In addition, the City would have to reduce water use by 20% to avoid exceeding the current cost plus 12%. If the City does not reduce water use by 20%, the rates will be assessed in a higher tier under the proposed tier allocation adjustment.

### **STAFF RECOMMENDATION**

Direct staff as deemed appropriate.

Attachment A: Notice of Proposed Water Rate Increase (February 2011)  
Attachment B: Notice of Proposed Water Rate Increase (October 2010)  
Attachment C: Protest Letter from City to Board (December 2010)

**NOTICE OF PROPOSED WATER RATE INCREASE  
AND ALLOCATION ADJUSTMENTS  
Ventura County Waterworks District No. 1**

Ventura County Waterworks District No. 1 (District) provides water and sanitation services to the City of Moorpark (City) and the contiguous areas to the north and west of the City limits. The District provides local water from groundwater wells and imported water from the State Water Project, through Metropolitan Water District (Metropolitan) and Calleguas Municipal Water District (Calleguas). The District is responsible for providing an uninterrupted, reliable water supply meeting specific water quality standards to District customers.

This notice is to inform you that a hearing will be held on Tuesday, April 5, 2011, at 10:30 a.m. in the Board of Supervisors' Hearing Room in the Hall of Administration at the Ventura County Government Center, 800 South Victoria Avenue, Ventura, to consider a proposed 12% water commodity rate increase and adjustments to water allocations for District customers. If approved, the rate increase and allocation adjustments would take effect on the utility bills issued in May 2011. At the hearing, any person may be heard regarding the recommended rate increase.

**Why is a rate increase needed?**

The District operates as an enterprise fund, which means it is supported solely through the rates paid by District customers. These rates provide the funding for efficient operations and maintenance of the water system, imported water purchases, and Southern California Edison (SCE) charges related to pumping local water.

Imported water costs to the District have increased 10% for calendar year 2011 (CY 11). In addition, SCE rates have increased 5%, and the projected operations and maintenance costs for CY 11 have also increased. The District's current Tier I rate is now less than the cost to purchase imported water, and will not provide sufficient funds for the operation and maintenance of the District in CY 11. Therefore, the District is recommending a water commodity rate increase and adjustments to the water allocations in order to provide the revenue needed to continue to operate the water system and provide a reliable water supply to District customers. A proposed rate increase, which was to be effective in January of this year and for which you received an earlier notice, was deferred due to the Board's request for additional analysis.

**Why do imported water rates continue to increase so drastically?**

The short answer is that the amount of water allowed to pass through the Sacramento Delta from Northern to Southern California is limited, due to a federal judge's decision to protect the Delta smelt, an endangered fish. Consequently, no matter how much rain or snowpack there is in the northern Sierras, or how full the reservoirs are in Northern California, there is limited water supply available to Southern California through the State Water Project. To make matters worse, the imported water supply from the Colorado River has been greatly reduced due to the ongoing drought in the Colorado River Watershed. Therefore, Metropolitan, the imported water supplier to Southern California, has pursued other sources of water, which are more costly. In addition, Metropolitan continues to replace aging infrastructure, which also impacts imported water rates.

Calleguas, the District's direct imported water supplier, purchases imported water from Metropolitan. Calleguas is investing in projects to provide alternative sources of water supply to lessen its service area's dependence on imported water. However, these projects will also be expensive, and are some years away. On January 25, 2011, representatives from Calleguas and Metropolitan gave presentations to the Ventura County Board of Supervisors regarding the current water supply situation and planned projects to provide a reliable water supply. To view these presentations and hear discussions about the many challenges related to water supply and water rates, please go to <http://countyofventura.org> and click on the following links: Board of Supervisors – Agenda & Summary, Live Broadcast & Video Archives, Meeting Archives, Board Regular Meeting January 25, 2011, and Item #28.

**Does the District have plans to develop additional local water supply, and will that impact future rate increases?**

The District is pursuing the Moorpark Desalter Project (Project) to produce additional local water supply from currently unpotable (due to high levels of salts) groundwater. Developing additional local water supplies will make us less dependent on imported water and should help to minimize future rate increases. The Project, which is scheduled to be constructed by 2015, is dependent on the completion of a Calleguas project to construct a brine line to carry the filtered salts to the ocean. Planning studies for the Project are underway.

**What is the rate review process?**

The water rates are reviewed each year, after the District receives notice from Metropolitan and Calleguas of their projected rate increases for the next calendar year, to determine whether a rate increase is needed for the District. Before an increase is proposed and presented to the Ventura County Board of Supervisors, the rate analysis is reviewed by the District's Citizens' Advisory Committee (Advisory Committee) for input and recommendations to the Board. The Advisory Committee holds regularly scheduled meetings, which are open to the public, on the second Thursday of each month. The meetings are held at the District Office at 6767 Spring Road, Moorpark, at 3:30 p.m. At these meetings, information is provided regarding operational issues and efficiencies in the District and the status of District infrastructure. There are also frequent updates regarding the District's budget.

**What happens if the proposed rate increase is not approved?**

Should a rate increase not be adopted at this time, operations and maintenance of the water system would be severely impacted, and the District would not be able to purchase the imported water that will be needed in the current year. The District may be forced to impose water rationing, and higher rate increases would be needed in the future.

**THE CURRENT AND PROPOSED WATER COMMODITY RATES AND ALLOCATIONS ARE SHOWN ON THE ATTACHMENT TO THIS NOTICE**

If you oppose the proposed water rate increase and/or allocation adjustments, your protest must be submitted in writing to be considered, even if you are planning to attend the public hearing. Your written protest must be received by the Ventura County Clerk of the Board prior to the April 5, 2011 public hearing.

Protests must contain the following information: 1) a description of the property, such as the Assessor's Parcel Number; 2) your Ventura County Waterworks District No. 1 Account Number; 3) whether you are the property owner of record or a lease holder. *Please note that if you were not the owner of the property as of Ventura County's last tax roll, please include written confirmation that you presently own the property;* and 4) indication that the water rate increase is being protested. You may send your written protest to:

Ventura County Clerk of the Board  
800 South Victoria Avenue  
Ventura, CA 93009

Further information regarding the proposed water rate increase and allocation adjustments may be obtained by calling (805) 378-3000, Monday through Friday, between 8 a.m. and 5 p.m. You may find additional information on our website at <http://publicworks.countyofventura.org>. Click on the following links: Water and Sanitation Services, Utility Services Division, and Ventura County Waterworks District No. 1.

## CURRENT AND PROPOSED WATER RATES AND ALLOCATIONS

### Municipal and Industrial (M&I) Monthly Water Rates

HCF = hundred cubic feet =748 gallons

	Tier I Rate	Tier II Rate	Tier III Rate
<b>Current</b>	\$2.162/HCF	\$3.243/HCF	\$5.405/HCF
<b>Proposed</b>	\$2.421/HCF	\$3.632/HCF	\$6.053/HCF

### M&I Tiered Monthly Allocations

Meter Size	Tier I	Tier II	Tier III
<b>Current Low Demand (November to April) Allocations in HCF</b>			
3/4"	0-14	15-25	26+
1"	0-28	29-49	50+
1 1/2"	0-56	57-98	99+
2"	0-98	99-172	173+
3"	0-210	211-368	369+
4"	0-420	421-735	736+
6"	0-840	841-1470	1471+

<b>Current Peak Demand (May to October) Allocations in HCF</b>			
3/4"	0-21	22-37	38+
1"	0-42	43-74	75+
1 1/2"	0-84	85-147	148+
2"	0-147	148-257	258+
3"	0-315	316-551	552+
4"	0-630	631-1103	1104+
6"	0-1260	1261-2205	2206+

<b>Proposed Year-Round Allocations in HCF</b>			
3/4"	0-14	15-25	26+
1"	0-28	29-49	50+
1 1/2"	0-56	57-98	99+
2"	0-98	99-172	173+
3"	0-210	211-368	369+
4"	0-420	421-735	736+
6"	0-840	841-1470	1471+

All M&I allocations will be reduced by 20% annually. Some customers have been approved for allocations different than those above, based on their specific water requirements. For those customers with tiered allocations, the current Low Demand allocations as shown on the bill, will be in effect year-round. If you have a question about your meter size or your allocation, please contact us at (805) 378-3000.

### Agricultural Monthly Water Rates

AF = Acre Foot

	Base Rate	Disincentive Rate
<b>Current</b>	\$1.839/HCF (\$801.07/AF)	\$2.640/HCF (\$1,149.98/AF)
<b>Proposed</b>	\$2.060/HCF (\$897.34/AF)	\$4.700/HCF (\$2,047.32/AF)

## NOTICE OF PROPOSED WATER RATE INCREASE Ventura County Waterworks District No. 1

Ventura County Waterworks District No. 1 (District) provides water and sanitation services to the City of Moorpark and the contiguous areas to the north and west of the city limits. The District provides local water from groundwater wells and imported water from the State Water Project, through Metropolitan Water District (Metropolitan) and Calleguas Municipal Water District (Calleguas).

Southern California is facing an unprecedented series of challenges to its water supply:

- A federal court has curtailed water deliveries from Northern California due to environmental factors in the Sacramento-San Joaquin Delta.
- California has been experiencing drought conditions since 2007. Furthermore, the runoff from the 2009 snowpack was below normal.
- The Colorado River, the other major source of imported water supply for Metropolitan, is experiencing a protracted multi-year drought.

Consequently, Southern California's water supply has been severely impacted.

In response, Metropolitan is securing other sources of water at a greater cost. Metropolitan's actions to provide a reliable water supply to this region are increasing Metropolitan's water rates substantially. To offset the Metropolitan rate increase, Calleguas is passing through the rate increase to its purveyors, including the District, effective January 1, 2011. The District's imported water costs are increasing by 10% in calendar year 2011. In addition, Southern California Edison (SCE) will be increasing their rates by approximately 5% in 2011.

The District's water rates have been reviewed to determine the impact of the Metropolitan/Calleguas and SCE rate increases. It has been determined that the increases cannot be absorbed by the District's current operating budget. Therefore, we are recommending a 10% increase in the Tier I commodity rate. Tier II and Tier III commodity rates will be increased per the District's Rules and Regulations. The rate increase is recommended based on a water rate analysis that showed the higher rate is necessary to cover the District's cost of providing an uninterrupted supply of high quality water to District customers. We are not recommending any increase in the service charge at this time. The District's last water rate increase of 16% was approved in December 2009, and implemented in calendar year 2010.

Current and proposed rates are shown in the following table:

<b>VENTURA COUNTY WATERWORKS DISTRICT NO. 1 WATER COMMODITY RATES</b>		
<i>Tiers</i>	<i>Current</i>	<i>Proposed</i>
Tier I	\$2.162/HCF (\$941.77/AF)	\$2.378/HCF (\$1,035.86/AF)
Tier II	\$3.243/HCF (\$1,412.65/AF)	\$3.567/HCF (\$1,553.79/AF)
Tier III	\$5.405/HCF (\$2,354.42/AF)	\$5.945/HCF (\$2,589.64/AF)
HCF = Hundred Cubic Feet AF = Acre-Feet		

Customers may call the District office to request a review of their Tier I allocation.

This notice is to inform you that a hearing will be held on Tuesday, December 14, 2010, at 10:00 a.m. in the Board of Supervisors' Hearing Room in the Hall of Administration at the Ventura County Government Center, 800 South Victoria Avenue, Ventura, concerning the proposed water rate increase. At the hearing, any person may be heard regarding the recommended rate increase.

If you oppose the proposed water rate increase, your protest must be submitted in writing to be considered, even if you are planning to attend the public hearing. Your written protest must be received by the Ventura County Clerk of the Board prior to the December 14, 2010, public hearing.

Protests must contain the following information: 1) a description of the property, such as the Assessor's Parcel Number; 2) your Ventura County Waterworks District No. 1 Account Number; 3) whether you are the property owner of record or a lease holder. *Please note that if you were not the owner of the property as of Ventura County's last tax roll, please include written confirmation that you presently own the property;* and 4) indication that the water rate increase is being protested. You may send your written protest to:

Ventura County Clerk of the Board  
 800 South Victoria Avenue  
 Ventura, CA 93009

Should the Board adopt the proposed rates, the increase in the water rates would be reflected in the utility bills beginning in January 2011.

**Water conservation today is more important than ever. Due to continuing pumping restrictions to protect endangered fish, Metropolitan is again requiring all water suppliers throughout Southern California to reduce their water consumption by 15% of their historical average this fiscal year (July 1, 2010 through June 30, 2011). Therefore, we are asking all of our customers to continue their efforts to conserve and reduce their water usage.**

Further information regarding the proposed rate increase or the District's water conservation programs may be obtained by calling (805) 378-3000, Monday through Friday, between 8 a.m. and 5 p.m.

# MOORPARK

Attachment C

799 Moorpark Avenue Moorpark, California 93021 (805) 517-6200

December 6, 2010

Ventura County Clerk for the Board  
800 South Victoria Avenue  
Ventura, CA 93009

RE: Ventura County Waterworks District No. 1 Board of Directors (Board) December 14, 2010  
Hearing on Proposed Water Rate Increase

Dear Honorable Board Members:

The City of Moorpark (City) is in receipt of your Notice of Proposed Water Rate Increase (Proposed Increase) for your December 14, 2010 Board Hearing. At its December 1, 2010 meeting, the City Council considered this matter and received a presentation by Reddy Pakala, Director of Water and Sanitation Department of the Public Works Agency, explaining the reasons for the Proposed Increase. While the challenges associated with water delivery are understood, the City Council feels that a 10% rate increase is not justified especially in the current economic situation and such increase should not be applied to the approximate 30% portion of the cost not directly related to the cost of purchased water. Therefore, the City respectfully protests this Proposed Increase for the 111 parcels it owns.

The City is the property owner of record for the following Assessor's Parcel Numbers:

506-0-200-035, 506-0-093-355, 506-0-010-640, 506-0-010-280, 505-0-260-275, 505-0-260-125, 505-0-260-285, 505-0-260-105, 505-0-260-085, 505-0-260-075, 505-0-260-060, 507-0-322-465, 511-0-050-305, 511-0-050-305, 511-0-050-255, 511-0-050-255, 511-0-050-245, 511-0-050-265, 511-0-050-225, 511-0-050-065, 511-0-050-140, 512-0-090-105, 512-0-090-115, 512-0-093-080, 512-0-091-080, 512-0-091-080, 512-0-062-070, 512-0-174-015, 512-0-150-765, 512-0-171-225, 512-0-171-225, 512-0-171-225, 513-0-060-160, 504-0-021-185, 506-0-343-295, 511-0-090-325, 512-0-270-010, 512-0-270-100, 507-0-122-155, 507-0-011-015, 507-0-011-025, 512-0-062-020, 512-0-062-120, 512-0-090-120, 512-0-091-090, 512-0-103-040, 513-0-070-135, 514-0-242-085, 514-0-242-095, 514-0-032-075, 514-0-032-245, 514-0-112-015, and various common open space areas that are not assigned Ventura County Assessor Parcel Numbers but are identified on invoices with County-assigned location names (see Attachment 1);

under the following Ventura County Waterworks District No. 1 Account Numbers:

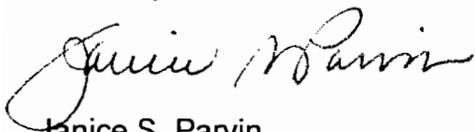

0040555015, 0041045004, 0041300021, 0041315011, 0041320001, 0041676004, 0041982001, 0041985003, 0041994001, 0041995001, 0041997001, 0042131011, 0043450003, 0043492001, 0043498001, 0045088001, 0045096002, 0045097003, 0045134002, 0045321001, 0110098004, 0110513012, 0110513101, 0110514002, 0110515008, 0110517028, 0110518038, 0110519057, 0110527001, 0110529021, 0110534039, 0110537001, 0110599030, 0110600005, 0110603002,

In the event the Board adopts the Proposed Increase on December 14, 2010, the City urges the Board to reconsider the implementation date. To implement the Proposed Increase on utility bills beginning in January 2011, which includes water services in November and December of 2010 – a period of time pre-existing the adoption of the Proposed Increase, sends the wrong message to water users. Many of those users, like the City, are already trying to do more with less and have worked to reduce their water use by an overall average of 22%.

Please consider this letter during your December 14, 2010 hearing. Thank you.

Sincerely,

Janice S. Parvin  
Mayor

Enclosure

cc: Honorable Councilmembers  
Steven Kueny, City Manager
