

**MOORPARK CITY COUNCIL
AGENDA REPORT**

TO: Honorable City Council

FROM: Kevin G. Ennis, City Attorney

DATE: 01/23/2019 Special Meeting

SUBJECT: Public Hearing to Receive Comments on the Transition to District-Based Elections and Drafts of Proposed Council District Maps and Sequencing of Elections

SUMMARY

The City of Moorpark has undertaken a process of considering whether to transition from a system of at-large elections to a system of district elections for electing its Council Members. This is the third of five scheduled public hearings required under the California Voting Rights Act (“CVRA”) for general law cities to convert to district-based elections. As of the date this staff report was published, the City has received nineteen draft maps from the public identifying proposed Council districts. Additionally, five draft maps were prepared by the City’s professional demographer. The public’s maps, along with the maps prepared by the demographer and summary tables are included as Attachment 1. Proposed election sequencing information is shown on each map in Attachment 1. Correspondence received that is in addition to the map submittals is included as Attachment 2.

This is the first public hearing where the City Council will receive public comments on the proposed district maps and sequencing schedule. The City Council may express a preference for one or more maps, direct the City’s demographer to change one or more of the maps, or request the preparation of additional maps.

BACKGROUND

As the Council is aware, the City of Moorpark currently elects its City Council Members through an “at-large” election system in which each Council Member can reside anywhere in the City and is elected by the voters of the entire City to provide citywide representation. This methodology for election of Council members has been in place since City incorporation in 1983. The office of Mayor is a separate, directly elected office with a term of office of two years, as established by voter approval of Measure D at an election on November 8, 1988.

On August 29, 2018, the City received a letter from Kevin Shenkman, an attorney of the law firm of Shenkman & Hughes, challenging the City's current election method and asserting that the City's at-large election system violates the CVRA. (Elections Code Sections 14025 through 14032) Mr. Shenkman's letter threatens litigation if the City declines to voluntarily convert to district-based elections for Council Members. The City has entered into a tolling agreement with Mr. Shenkman that precludes him from filing a lawsuit under the CVRA until April 9, 2019.

On October 11, 2018, the City Council adopted a Resolution of Intent to transition from at-large to district-based elections for the election of Council Members. Adoption of the Resolution of Intent did not commit the City to any one course of action, but instead set forth a timeline and process by which the City would conduct public hearings on the proposal and prepare and review draft Council district maps.

On November 13 and December 12, 2018, the City held the first two public hearings to receive comments regarding the transition of the City from at-large elections to district-based elections for Council Members and the composition of the City Council districts. City staff and the City's contracted demographer answered questions regarding district-based elections and heard from residents regarding their preferences and concerns about potential district maps. Residents were invited to prepare their own district maps for consideration by the City Council. Minutes from these meetings have been included in Attachment 3.

DRAFT MAPS

As part of the process of transitioning to district-based elections, the City retained Doug Johnson of National Demographics Corporation (NDC) to analyze the City's demographic and voting data and to draft proposed district maps for the election of Council Members by district. Applying districting principles under the CVRA, Mr. Johnson prepared five maps, three of which divide the City into four Council districts plus an at-large elected Mayor, and two of which divide the City into five Council districts with a Mayor chosen from among the Council. Mr. Johnson believes that each of these five maps balances the City's population roughly equally between each of the districts, as required by the CVRA. These five maps that were prepared by the City's demographer were published on the City's website on January 16, 2019, consistent with the minimum seven-day publishing requirement in Section 10010(a)(2) of the Elections Code.

In addition, the City received nineteen maps from the public: three five-district maps, fifteen four-district maps, and one three-district map. Some of these maps, however, are not population balanced and could be susceptible to

challenge under the CVRA. The three-district map would not provide a sufficient number of Council Members under California law. All draft maps of the proposed boundaries of the districts received from NDC and the public are currently published on the City's website and include the population and proposed election sequencing information, and these files and all of the public hearing agenda records are also available in the Office of the City Clerk, and can be emailed or printed upon request.

If the City Council revises a draft map (or maps) at or following the public hearing on January 23, 2019, that map (or maps) must be published and made available to the public for at least seven days before being adopted. The next public hearing on District maps and sequencing is scheduled for February 6, 2019, and per the schedule would need to include introduction of an ordinance. The final public hearing required to implement district-based elections is scheduled for March 6, 2019, and that meeting is planned to include ordinance adoption. The seven-day deadline for publishing maps prior to the City Council March 6, 2019 meeting is February 27, 2019.

Mr. Johnson will present all of the draft maps included in Attachment 1 to the City Council and explain the strengths and weaknesses of each.

Districting Process

Effective January 1, 2017, Elections Code Section 10010 established a new process for switching to district-based elections. The process includes a series of public hearings at which the public is invited to provide input regarding the composition of the districts. The purpose of the first two public hearings is to receive comments regarding the transition of the City from at-large elections for Council Members to district-based elections for Council Members, the time frame for this transition, and the criteria and factors that go into the drawing of maps of single-member voting districts.

In addition to maps prepared by residents, a professional demographer with extensive experience in CVRA and drafting Council districts has drawn five maps. In creating the draft maps of the proposed boundaries of the districts, the demographer considered the public comments received by the City during its first two public hearings. After the draft maps were drawn, the City made all twenty-four draft maps available to the public. Each draft map identifies the potential sequence of elections for that map, if the City Council Members will be elected at different times to provide for staggered terms of office. Each draft map also identifies whether the position of Mayor will continue to be elected at-large, under the current practice approved by voters over thirty years ago, or will be selected from one of five Council Members elected from each district.

The proposed schedule for the transition from at-large elections to district-based elections for City Council requires five public hearings between November 13, 2018 and the proposed date of March 6, 2019 for the adoption of the ordinance establishing district-based elections (scheduled items in italics are proposed to be completed at this hearing):

- October 11, 2018 Adoption of proposed resolution stating the City's intent to transition to district-based elections
- November 13, 2018 Public Hearing No. 1
- December 12, 2018 Public Hearing No. 2
- January 16, 2019 Draft maps of proposed Council districts and sequencing available
- *January 23, 2019* *Public Hearing No. 3*
- February 6, 2019 Public Hearing No. 4 and introduction of ordinance
- March 6, 2019 Adoption of proposed ordinance to elect Council Members by districts (ordinance would be effective 30 days after adoption)

Public comments on the transition and on the proposed district maps are very important and public participation at the public hearings is encouraged.

FISCAL IMPACT

The City through its City Attorney retained National Demographics Corporation to analyze the demographic data and voting data of the City and draft proposed district maps for the election of Council Members by district. If a claim for the attorney fees is made by Mr. Shenkman, the maximum potential liability to the City under Elections Code Section 10010 is \$30,000 if the City ultimately transitions to district-based elections within the agreed upon timeline. The legal and contract services costs including the anticipated \$30,000 payment were budgeted by the City Council at its meeting of November 7, 2018, through the adoption of a budget amendment resolution. Staff costs to administer the process are in addition to the previously approved budget amendment.

STAFF RECOMMENDATION

Staff recommends that the City Council:

1. Hold the third public hearing to receive public comments regarding the transition of the City from at-large elections to district-based elections for City Council Members, the content of the draft Council district maps, and the proposed sequencing of elections; and

2. Provide direction to staff concerning a preferred map(s), any changes the Council may wish to incorporate into the preferred map(s), or request additional maps.

ATTACHMENTS

1. Draft Maps (including Demographic and Voting Information for Draft Maps and Summary Tables)
2. Correspondence received in addition to Draft Maps

**Draft District Maps
Submitted to the City**

January 16, 2019

Map 401 - Jeni Rose-Dullaghan, Robert Jacobs & Patricia Jacobs (each submitted the same map)

Jeni Rose-Dullaghan: I think this map makes sense because . . . it divides the city into a NW [2], a NE [1], a SE [3] and a Central [4] district which uses natural dividing lines to accomplish the re-districting and is a relatively simple while still achieving our goals.

Robert Jacobs: I think this works fairly for all.

Patricia Jacobs: This seems to be a rather simple, straightforward solution to a pressing issue.

Map 402 – Stephanie Anderson

Districts based on geographical location. In so far as possible, neighborhoods are kept together.

Map 403 – Janine Atkins – **not population balanced**

Map 519 – Janet Murphy & Dawn Mortara – “5 districts version 1”

I think this map makes sense because: All 5 districts have some LA Ave. connection, some connection to Arroyo Simi, and a connection to some major business center in town, some bigger connection than others (to businesses), but all have SOME business connection. Three of five districts have some connection to Tierra Rejada Rd., which is as many as could be expected given other city geography. Two (maybe three) districts have connection to TR Valley greenbelt. District 2 preserves community of interest (COI) of Campus Park/Varsity Park Estates/Campus Hills and Villa del Arroyo Mobile Home Park while adding contiguous spur to LA Ave. and major business center. Dist. 3 preserves COI of downtown historical Latino neighborhoods, while including Virginia Colony and major central business centers including High St. Dist. 4 largely preserves COI of Peach Hill/Steeple Hill and Serenata (Carlsberg) while having several major business centers. Dist. 5 preserves a large chunk of Mountain Meadows north of TR Rd. plus some to S of TR Rd to make numbers

fit, plus some major business areas. Dist 1 preserve the newer gated communities together but also wraps around to include the remainder of Mt. Meadows that could not otherwise fit in another district (mostly S of TR Rd.). It also includes most businesses west of TR/Gabbert Rd. No consideration at all for where existing council members live. Done just for COI and to give broad rep from many districts for multiple primary issues.

Map 520 – Janet Murphy & Dawn Mortara – “5 districts version 2”

I think this map makes sense because of the same main reasons as our Version 1 five-district map: all five districts connect to LA Ave, Arroyo Simi, and major business centers. Also, communities of interest reflect historical trends in Moorpark since incorporation, as did Version 1 of five-district map. However this version 2 is slightly adjusted from version 1 to reflect a way to include Population ID area 38 with Peach Hill/Steeple Hill area of town since we asked people who live there and they said they consider themselves more part of Peach Hill than Mt. Meadows, where Version 1 map had them. Please read the version 1 explanation for the rest of the info, along with the email that accompanied this submittal.

Map 421 – Janet Murphy & Dawn Mortara– “4 districts version 1” – **not population balanced**

I think this map makes sense because the overall goal already mentioned (when discussing 5 districts) of having each district touch LA Ave, the Arroyo, and some part of a main business district is still part of this and is honored by this version, as well.

Map 422 – Janet Murphy & Dawn Mortara – “4 districts version 2”

I think this map makes sense because the overall goal already mentioned (when discussing 5 districts and above) of having each district touch LA Ave, the Arroyo, and some part of a main business district is still part of this and is honored by this version, as well.

Map 423 – Janet Murphy & Dawn Mortara– “4 districts version 3”

"I think this map makes sense because the overall goal already mentioned (when discussing 5 districts and above) of having each district touch LA Ave, the Arroyo, and some part of a main business district is still part of this and is honored by this version, as well.

Map 424 – Steve Kueny

To: Deborah Traffenstedt

Debbie, I'm submitting a second 4 District proposal. Please forward to consultant. District #1- Areas 32,33,34,35,36,37,46,47 and 48 with population of 8,692. District #2 - Areas 25,26,27,28,29,,38,39,40,41,42,43,44 and 45 with population of 8995. District # 3 - Areas 1,2,3,4,5,6,7,8,9,10,11,15 (except the area on Charles Street and adjoining cul de sac streets east of Spring Road; I estimate the population of Area 15 remaining in this proposed District # 3 to be 374),30 and 31 with population of 8236. District # 4 - Areas 12,13,14,15 (that portion of Area 15 on Charles Street and adjoining cul de sac streets east of Spring Road; I estimate the population in this area to be 358) , 16,17,18,19,20,21,22,23 and 24 with population of 8492. Please add the following to the COMMENT section to be shown on web site : Of the two proposals I've submitted I prefer this one because 1) the Districts are compact and recognize the historic geographic areas of the city; and 2) the number and location of residential units completed after 2010 Census date of April 1, 2010 and projected to be completed by 2020 Census date of April 1, 2020 would allow this 4 district map to be easily adjusted to recognize the added population by adding Area 31 which had no added residential units with current estimated population of 548 to District #1 (removed from District # 3) for estimated total 2020 population of 9240. District # 2 add estimated 576 people to Area # 29 for total estimated 2020 population of 9571. District # 3 add estimated population of 790 to Area #1, add estimated population of 1504 to Areas 6,7 and 15; remove Area 31 and place it in District # 1 ,and remove Areas 8 and 9 and place them in District # 4 for estimated 2020 population of 9293. District # 4 add Areas 8 and 9 plus combined estimated population increase of 170 for estimated 2020 population of 9293. Thanks, Steve Kueny.

Subject: Mayoral election process

City council folks,

Please consider my opposition to changing our mayoral election process.

First, I am dismayed at our having to transition to council districts. There is a very real risk of developing an “us versus them” attitude in our city where none, to my knowledge at least, exists now. In addition this change makes it easier for outside, potentially partisan, groups to impact our election process because each district instantly requires one fourth the cost for paid “canvassers”, ad campaigns, or political groups to impact. Having said that I understand your decision to accept the change to districting council member seats.

Our city just didn’t have the resources to fight a losing legal battle.

With that in mind it becomes even more important that the mayoral seat remain a directly elected position. It isn’t hard to imagine a scenario where one part of the city feels disenfranchised with the council’s mayoral selection (or other decisions) because council members from “other” council districts voted a certain way. We could see perceived negative divisions of our populace based on race or wealth. These divisions do not exist NOW in Moorpark but there are groups of agitators outside our city that profit (politically) by dividing people into groups. I believe these “agitators” are the ones who imposed the districting of our council seats in the first place. A directly elected mayor will be able to serve as an arbiter between any possible perception of sectarian (us versus them) feelings because he/she will be elected by and represent the entire city rather than the council districts that voted for he/she. Things are pretty harmonious now in Moorpark but future councils may have to make very tough decisions. The perception of “cabal” making decisions in a smoke-filled room could materialize. We NEED a mayor that represents the entire city to maintain faith in our city government.

For the above reasons please do not vote to change our mayoral election process.

Thank you

John Allred

Subject: City-wide Mayor

To whom it may concern re: districting the city for elections.

I understand that there is a movement afoot to change the Mayor's election procedure from city-wide voting to election of the Mayor by City Council members.

I AM OPPOSED TO THAT!

I want the ability to elect the person who is going to represent me and Moorpark in County-wide decisions that will affect Moorpark.

When I'm unhappy with the mayor I want the ability to vote him/her out and not depend on City council members who may have "an axe to grind"

I want the Mayor's office to be elected on a city-wide basis, not by City council members.

Subject: Re: Moorpark Needs to Have a Mayor

My name is Elizabeth Groden. I have been a Moorpark resident since 2002.

I believe it is important for Moorpark to continue to have a Mayor. A Mayor provides City-wide leadership, addresses City-wide infrastructure and other City needs (present and future), and is there to spearhead and effect City government. A Mayor provides important leadership— not only within the City, but in representing the City to the outside world. A mayor can network with and reach out to other Mayors/Cities in identifying common goals, problems, and solutions going forward.

Moorpark should definitely continue to have a Mayor— for all of the above reasons, and more. It is essential.

Subject: District-based elections

Hello,

As I have heard of the 4 districts vs. 5 districts issue, I wanted to share that I believe the 4 districts retaining the at-large mayor is the better choice. A rotating mayor position would not be as effective as an elected mayor.

I urge those involved to choose the 4 districts with at-large mayor option.

Best wishes,
Joan

Subject: City of Moorpark

Ms. Traffenstedt,

I understand that you are involved in the process to create districts for the City Council. I wanted to voice my opinion about the process and the fact that I want the Mayoral position to remain a separate, all district, elected position.

I want to elect my Mayor. I do not want the Council of 5 to have to "share" the position based on their decision. When I choose a City Council member to elect from those running, I choose that person based on their knowledge of the community, dedication to the position, efforts and volunteerism in our community and other factors. I know the Mayoral position takes a unique dedication of time, effort, leadership and skills. I do not think that all of our Council members would make a quality mayor and when we vote by district, the potential candidate pool may even render more individuals who aren't deeply qualified to be Mayor.

Furthermore, I do not want to create the potential for a combative relationship among the council members as evidenced back in Moorpark's history where infighting caused us to have 3 Mayors in one night. I think there is no possible positive that pits the 5 members against each other for a coveted position. I encourage each of them to risk their 4 year seat to run for a 2 year position if it really means that much to them. And, in the past few elections, no council member has chosen to risk their 4 year seat for the 2 year Mayoral position.

As a resident of Moorpark, I have watched how our elected leaders have worked together and effectively been inclusive of all parts of our city. As a resident of a variety of different neighborhoods around the city, I have never felt my region was neglected or singled out in favor of another. That is due to the power of our voice at City Hall and the fact that every voice matters. Please hear this voice who looks at this matter as a concerned citizen and not someone with an agenda of any type. I love our city and support the independence of our uniquely citizen voted Mayor and individually elected city council members. Please retain that separation and distinction.

Thank you,
Wendy Rokos, M.Ed.

Subject: opinions

We have lived in Moorpark since 1994. We prefer one district and one mayor, but since we have no choice in this re-districting scenario, we would like to say that 4 districts and 1 at large mayor is preferred over 5 districts and a rotating mayor which is simply a stupid idea.

Thanks,
Richard and Lise Houston

Cc: Van Dam Mark
Subject: Elected Mayor and District based Council Members

To whom it may concern,

As a resident of Moorpark for over 17 years I have seen many elections. I believe that the prior system of generally elected Council Members was effective and served all of Moorpark well. However, I completely understand the move toward districts to represent the potentially underrepresented equally. I also recognize the legal issue that drove us to that position. That comes with a But. Gerrymandering becomes a risk that can entrench misrepresentation. Independent protection needs to be in place to help prevent that. Regardless, the district approach narrows the populace within a particular district that a Council Member can be chosen from, especially in a small city like Moorpark. So, the variability in experience and time availability increases.

The Mayor position is different. It should be a position that represents all of Moorpark and not just a honorary handoff between Council Members. I would expect the Mayor to be much more visible and to dedicate more time to the position than the average Council Member. The Mayor is the face of the city, both in side and outside the city limits. Handing it around the Council Members dilutes that image. The time commitment needs to be something that a candidate wants to accept. If the average Council Member is not able to commit that time and/or does not have the experience and personality for the job, then the position loses effectiveness.

My recommendation is to leave the Mayor as a generally elected position.
Thank you for your time,
Bill Munsch

Subject: voting districts

To Whom It May Concern:

I am voicing my opinion as a Moorpark resident, thank you for allowing me to do so.

While I am not happy about the "district" voting issue, I believe the 4 separate districts and a mayor at large is best for our community. I do NOT like a 5 district possibility with a "rotating" mayor. The position of Mayor needs to be one who is specifically interested in that position, has the skillset required to be Mayor and the scheduling availability. Most Council members have full time positions to earn an income for their families, and being an ad hoc Mayor on a rotating basis is a HUGE fail for our community.

Subject: Elected Mayor position

To the City of Moorpark,

I am in favor of having one elected Mayor.

We need one person to represent ALL of Moorpark, not just a small segment. One person consistently in the position of Mayor is more effective overall. It only stands to reason that if a person is in a position for a length of time, they have more working knowledge of the whole.

Not all council members want to be Mayor or hold that position and may be out of their comfort zone doing so.

Mayor Parvin has always put in the time and effort to make Moorpark the best city it can be. Keeping the elected mayor is very important to me and our city.

Thank you,

Subject: Dec. 12 Public Hearing

Dear Ms. Traffenstedt

I am unable to attend the public hearing on 12/12/18 regarding the District Composition Plan but would like to express my views to the City Council through this email.

The current plan will create 4 districts for city council members and one "at large" position for City Mayor. Instead I recommend the creation of 5 districts. In my view, the diverse populations of the city will be better represented through the creation of 5 districts and eliminating the "at large" position of Mayor. For the position of Mayor, I support the model where the 5 council members select the mayor which was the procedure when the city was first incorporated.

Thank you for considering my request.

Diane,

Attached is a map showing the HOA areas in Moorpark. We can't guarantee that this 100% accurate, because we do not have all of the documents that are filed with the State Department of Real Estate for the various HOA's, but the attached map shows our general understanding of the HOA boundaries. As an example, there may be variations for the open space areas included in the HOA boundaries. Also, we showed only the master HOA for Moorpark Highlands. There are also multiple neighborhood HOA's in addition to the master HOA for that planned community. Let me know if I can help you with anything else.

1. Precincts will likely be redrawn, so not a factor. Thanks for that info.

2. I can go to Moorpark Unified to get school map.

This was a major factor in the map that will likely be adopted in Simi Valley. Maybe this area of interest does not apply in our community.

3. Will wait to receive HOA map from you. HOAs appear to be major area of interest since there are so many in our community.

Thanks Deborah!

Subject: RE: 11/15/18 Emails regarding District-Based Elections
Attachments: 2018-1113 Public Hearing Moorpark Intro to Districting.pptx; Moorpark Unified School District Boundary.pdf

Diane,

Just wanted to let you know that I'm working on getting you a up-to-date map with the HOA boundaries and will send it via a separate email when completed.

I have attached an MUSD boundary map (see the MUSD website for an interactive map: <https://betalocator.decisioninsite.com/?StudyID=85026>). The MUSD boundary map is not really applicable to the City Councilmember districts, because that boundary extends outside the City limits. We do not currently have a map showing the attendance boundary for each of the MUSD elementary and middle schools, although the MUSD interactive online map shows the distance to the closest school when an address is entered. MUSD does allow and encourage a school of choice selection, so the attendance boundaries are not necessarily significant. For example, I live in Mountain Meadows, but my children attended Walnut Canyon School. If you want me to see if I can obtain a map from MUSD showing individual school attendance boundaries, let me know.

In regard to your question about viewing current election precinct maps, we would need to purchase those from the County of Ventura, but I do not believe the current election precincts are applicable to the formation of new City Councilmember election districts. After the new City of Moorpark Councilmember district map is approved by ordinance by the City, the County of Ventura election precinct maps will be revised accordingly. For example, Section 12222 of the State Elections Code includes the following requirement:

[12222.](#)

(a) No precinct shall be established so that its boundary crosses the boundary of any supervisorial district, congressional district, senatorial district, Assembly district, board of equalization district, judicial district, incorporated city, ward, or city council district.

I have attached a copy of the PowerPoint from the November 13 public hearing. Suggested slides to review in the attached file include: Slide 5, which shows traditional redistricting principles that may be considered; Slide 7, which shows the areas in the City with a high Latino population concentration; and Slide 8, which further defines a community of interest.

Regarding your question about the deadline to submit a map, our demographer has to release to the public draft maps no later than January 16, 2019, which is one week prior to the first public hearing on District Map(s) and Sequencing on January 23, 2019. This means that you should consider initially submitting any map suggestions before the demographer produces the maps to be released on January 16. Comments on draft map(s) will then continue to be received through the public hearing process for District Maps and Sequencing (January 23 and February 6).

I will be sending you an HOA map when it is completed. District map suggestions should be submitted to: districtelections@moorparkca.gov or mailed to the City of Moorpark, Attention District Elections, 799 Moorpark Avenue, Moorpark, CA 93021.

City of Moorpark

Introduction to Districting

November 13,
2018

- Under the Federal Voting Rights Act (passed in 1965), a jurisdiction must fail 4 factual tests before it is in violation of the law.
- The California VRA makes it significantly easier for plaintiffs to force jurisdictions into “by-district” election systems by eliminating two of the US Supreme Court *Gingles* tests:
 - + ~~Can the protected class constitute the majority of a district?~~
 - 2 Does the protected class vote as a bloc?
 - 3 Do the voters who are not in the protected class vote in a bloc to defeat the preferred candidates of the protected class?
 - + ~~Do the “totality of circumstances” indicate race is a factor in elections?~~
- Liability is now determined only by the presence of racially polarized voting

□ Switched (or in the process of switching) as a result of CVRA:

- At least 175 school districts
- 28 Community College Districts
- 100+ cities
- 1 County Board of Supervisors
- 10 water and other special districts.

□ Key settlements:

- Palmdale: \$4.7 million
- Modesto: \$3 million
- Highland: \$1.3 million
- Anaheim: \$1.1 million
- Whittier: \$1 million
- Santa Barbara: \$600,000
- Tulare Hospital: \$500,000
- Madera Unified: about \$170,000
- Hanford Joint Union Schools: \$118,000
- Merced City: \$42,000

Districting Process

4

Step	Description
Two Initial Hearings Nov. 13 & Dec. 12	Held prior to release of draft maps. Education and to solicit input on the communities in the District.
Release draft maps	Maps must be posted at least 7 days prior to 3 rd hearing.
Two hearings on draft maps Jan. 9 or 16 & Feb. 6 or 13	Two meetings to discuss and revise the draft maps and to discuss the election sequence.
Map adoption Feb. 6 or 13 & Feb. 13 or 20	Map adopted via ordinance. Final map must be posted at least 7 days prior to adoption.

Federal Laws

- ❑ Equal Population
- ❑ Federal Voting Rights Act
- ❑ No Racial Gerrymandering

Traditional Redistricting Principles

- ❑ Communities of interest
- ❑ Compact
- ❑ Contiguous
- ❑ Visible (Natural & man-made) boundaries
- ❑ Respect voters' choices / continuity in office
- ❑ *Planned future growth*

Demographic Summary

Each of the four districts must contain about 8,605 residents.

Race/Ethnic Profile			ACS Profile		
	Count	Percent		Count	Percent
Total Population	34,421		ACS Total Population	35,029	2%
Latino	10,813	31%	Immigrant	6,257	18%
NH White	19,654	57%	Naturalized (pct of total immigrants)	2,940	47%
NH Black/African-American	600	2%	Age 5+	32,993	
NH Native American	213	1%	Speak English at home	23,694	72%
NH Asian-American	2,840	8%	Speak Spanish at home	6,564	20%
NH Pacific Islander	74	0%	Speak an Asian language at home	1,139	3%
NH Other	89	0%	Speak other language at home	1,595	5%
NH Multi-Race	138	0%	Speak English only "well" or less	3,810	12%
Citizen VAP total	23,476		Age 25+	22,855	
CVAP Latino	4,970	21%	Age 25+, no HS degree	2,884	13%
CVAP NH White	15,951	68%	Age 25+, HS degree (only)	11,469	50%
CVAP NH African-American	373	2%	Age 25+, bachelor degree (only)	5,776	25%
CVAP NH Asian & Pacific Islander	1,944	8%	Age 25+, graduate degree (only)	2,727	12%
CVAP Other	239	1%	Households	10,584	
			Child under 18 in Household	3,993	38%
			Income \$0-25k	759	7%
Voter Registration (Nov. 2016)	20,573		Income \$25-50k	1,336	13%
Latino Reg	4,427	22%	Income \$50-75k	1,541	15%
Asian-Surnamed Reg.	883	4%	Income \$75-200k	5,389	51%
Filipino-Surnamed Reg.	209	1%	Income \$200k+	1,558	15%
Est. NH White Reg.	14,501	70%	Housing units	10,981	
Est. African-Amer. Reg	297	1%	Single-Family	9,455	86%
Democratic Reg.	7,268	35%	Multi-Family	1,526	14%
Republican Reg.	7,823	38%	Rented	2,811	27%
Other/No Party Reg.	5,482	27%	Owned	7,772	73%
Voters Casting Ballots (Nov. 2016)	17,056		Voters Casting Ballots (Nov. 2014)	9,397	46%
Latino voters	3,485	20%	Latino voters	1,475	16%
Asian-Surnamed voters	693	4%	Asian-Surnamed voters	351	4%
Filipino-Surnamed voters	165	1%	Filipino-Surnamed voters	83	1%
Est. NH White voters	12,256	72%	Est. NH White voters	7,297	78%
Est. African-Amer. Reg	252	1%	Est. African-Amer. Reg	68	1%
Democratic voters	6,128	36%	Democratic voters	3,180	34%
Republican voters	6,741	40%	Republican voters	4,383	47%
Other/No Party voters	4,187	25%	Other/No Party voters	1,834	20%

Latino Population

Latinos are particularly concentrated around the center of the city and along Hwy 118.

7

Asian-Americans and African-Americans are not concentrated anywhere in the city.

Defining Communities of Interest

8

1st Question: what is your neighborhood or community of interest?

A Community of Interest is generally defined as a neighborhood or community of shared interests, views, problems, or characteristics.

Possible community feature/boundary definitions include:

- ❑ School attendance areas
- ❑ Natural neighborhood dividing lines, such as highway or major roads, rivers, canals, and/or hills
- ❑ Areas around parks and other neighborhood landmarks
- ❑ Common issues, neighborhood activities, or legislative/election concerns
- ❑ Shared demographic characteristics
 - ❑ Such as similar levels of income, education, or linguistic isolation

2nd Question: Does a Community of Interest want to be united in one district, or to be divided to have a voice in multiple elections?

Sample Compact Maps

City of Compton
2012 Redistricting
Plan Adopted Oct. 23

Compton

Glendale Unified Areas

Examples of highly compact maps, with nooks and jogs driven only by equal population requirements.

November 13, 2018

Sample Multiple-Representative Maps

10

South Pasadena

Examples of maps where a desire to have all members touch downtown (Pasadena) or rural areas (Central), or as many neighborhoods as possible (South Pas), led to policy-driven but non-compact maps.

November 13, 2018

Map-Drawing Tools

11

- This is your chance to actually draw the map, rather than only commenting on maps drawn by others.
- Draw your neighborhood; draw the district you want for your area; or draw an entire citywide map.
- You can use the paper map, the Microsoft Excel tool, the online tool, or any other map.

Using the One-Page Paper Map

City of Moorpark 2018 Districting Public Participation Kit Map

An online version of this map that allows you to zoom in and out for more detail is available as a link from the City website.

Each number indicates the total population of that "population unit" area. Each district must have essentially equal population. The population of each of the four districts you draw must be close to 8,605, with no more than a 860-person difference between the largest and smallest.

Name: _____
 Email: _____
 Phone: _____

Using the Excel tool

Enter the district assignment in the highlighted column, and Excel will calculate the resulting demographic changes.

Public Hearing & Discussion

15

1. What is your neighborhood or “community of interest”?
2. Do you prefer your neighborhood be kept together in one district or have multiple representatives?
3. What are other communities of interest in the City that should be considered when drafting maps?

Sheet & Timeline.pdf

Diane,

See the New Agenda link in the following email for the agenda for the meeting on Tuesday, November 13. The map for drawing will be available at Tuesday's meeting and next week we should then also have the Public Participation Kit map and online drawing tool available on our website (we are closed on Monday for the holiday). You indicated in your prior email that you didn't find the meeting schedule on our website, so I have attached that schedule for your convenience.

City of Moorpark District-Based Elections

www.moorparkca.gov/Districts

BACKGROUND

On October 11, 2018, following receipt of a threat of costly litigation, the City Council voted 5-0 to transition the City's at-large election system to a district-based election system. In a district-based election system, the City is carved into geographic districts. Voters in each district then choose their City Council representative, who must also live in that district. The Mayor would continue to be elected through an at-large election system.

GET INVOLVED

The City wants your ideas and feedback about how the districts should be drawn. Please attend the events listed to the right and bookmark www.moorparkca.gov/Districts for up-to-date information about the districting process.

Subject: City of Moorpark District-Based Election Map Drawing

Diane,

I'm really happy to hear that you are interested in participating in the map drawing process. Our contractor, National Demographics Corporation (NDC), is currently working on the map that they are creating for the public participation kit, which map will include population numbers in a grid format for the entire City of Moorpark. I know that a one page paper map file will be available by the day of the 1st public hearing meeting on Tuesday, November 13, but due to the Monday holiday, I don't think it will be available earlier. Also, we are paying for an online mapping tool for which NDC is in the process of acquiring the license for Moorpark. That online mapping tool for the Moorpark map should also be available by next week and a link will then be made available on our City website.

The 4 districts for Councilmember elections will have to contain essentially equal population numbers (which is the purpose of creating all of the population grids to facilitate the district map drawing). Small population deviations are permitted for the districts if they are necessary to achieve traditional redistricting principles which include: maintaining communities of interest, creating compact, contiguous districts; or using visible natural or manmade boundaries. The public's input is needed to identify "communities of interest" and also to understand how a community wants to be represented: Such as, do the residents of a particular community want that area to be kept together (to be a larger part of a single Councilmember's district); or do the residents want to be divided (in order to have the interest of more than one City Councilmember)? NDC has extensive experience with the district-based election process, and they will explain the map drawing process at our public hearing on Tuesday of next week.

Following the presentation and opportunity for public comment at the public hearing on November 13, the NDC representative will be available to provide some one-on-one instruction to persons attending who have questions on how to draw a paper map as well as how to use the online mapping tool. So we will definitely have paper maps available for you to pick up at that meeting or you will be able to print the paper map template from our website or use the online mapping tool. Hopefully, you are available to attend next Tuesday's meeting at 6:30 p.m. at the Moorpark Community Center (Apricot Room), otherwise, the 2nd public hearing on December 12 at 6:30 p.m. (same meeting location) will provide the same information and opportunity for assistance with map drawing.

MINUTES OF 11/13/2018 AND 12/12/2018 COMMUNITY MEETING PUBLIC HEARINGS

MINUTES OF THE DISTRICT-BASED ELECTION
COMMUNITY MEETING

Moorpark, California

November 13, 2018

A District-Based Election Community Meeting of the City of Moorpark was held on November 13, 2018, in the Community Center of said City located at 799 Moorpark Avenue, Moorpark, California.

1. CALL TO ORDER:

City Clerk Maureen Benson called the meeting to order at 6:37 p.m.

2. PLEDGE OF ALLEGIANCE:

Former City Manager Steven Kueny led the Pledge of Allegiance.

3. PUBLIC HEARING:

- A. First Public Hearing for District-Based Election Process to Invite and Receive Public Input Regarding the Composition of the Districts for the Election of City Councilmembers Prior to Drawing a Draft Map or Maps of the Proposed Boundaries of the Districts. Staff Recommendation: The City Manager will open the public hearing and direct National Demographic Corporation to provide a presentation and explanation of the districting process, public input will be encouraged and received regarding the composition of the districts, and the public hearing will be closed. (The second public hearing on the Composition of the Districts is scheduled for December 12, 2018, at 6:30 p.m.)

City Manager Troy Brown opened the public hearing and introduced demographer Douglas Johnson of National Demographics. Mr. Johnson provided a PowerPoint presentation which included discussion of why the City has initiated the process to move to district-based elections, the required time frame for accomplishing this, the requirements of state and federal law, and the tools the City of Moorpark has available on its website for residents to draw their own district maps to present to the City for consideration.

Four members of the community spoke during the public hearing and Mr. Johnson responded by providing additional clarification on the process for drawing districts. He also provided additional explanation regarding how increasing the number of districts in a City the size of Moorpark is an option, but not common, because this would result in a lower number of voters in each district, and that this could result in a Councilmember being elected by a small number of voters.

In response to a question about whether more than four (4) districts could be mapped, Assistant City Attorney Nicholas Ghirelli, explained that to change the number of districts requires a vote of the people, and there is not time for an election prior to the deadline for the safe harbor ordinance adoption.

In response to a question regarding how often the districts would be redrawn and how incumbents would serve out their current term of office following establishment of the districts, Mr. Johnson explained the districts must be redrawn every 10 years after the census is completed. He also discussed scenarios for Councilmembers serving out their term of office and sequencing for district implementation in the 2020 and 2022 elections. Mr. Johnson also responded to questions about the priority for election year 2020 or 2022 sequencing for a new district with a high Latino voter population.

In response to a question whether a population area could be divided to create two districts representing Moorpark College, Mr. Johnson confirmed that a street could be used as a boundary to divide Moorpark College into two districts; however, he also stated that it was important to remember that college students lived throughout the whole City. Mr. Brown provided a street boundary example for the Moorpark College area that wouldn't actually split the College property.

Mr. Johnson discussed mapping tools that would be available on the City's website, and Mr. Chong shared information that the City's website at www.moorparkca.gov/districts contains the tools for mapping and all communications regarding the district-based election process.

Mr. Brown closed the public hearing and reminded the public the next community meeting for the district-based election process will be on December 12, 2018.

4. ADJOURNMENT:

The meeting adjourned at 7:34 p.m.

Troy Brown, City Manager

ATTEST:

Maureen Benson, City Clerk

MINUTES OF THE DISTRICT-BASED ELECTION
COMMUNITY MEETING

Moorpark, California

December 12, 2018

A District-Based Election Community Meeting of the City of Moorpark was held on December 12, 2018, in the Community Center of said City located at 799 Moorpark Avenue, Moorpark, California.

1. CALL TO ORDER:

City Clerk Maureen Benson called the meeting to order at 6:49 p.m.

2. PLEDGE OF ALLEGIANCE:

City Manager Troy Brown led the Pledge of Allegiance.

3. PUBLIC HEARING:

- A. Second Public Hearing for District-Based Election Process to Invite and Receive Public Input Regarding the Composition of the Districts for the Election of City Councilmembers Prior to Drawing a Draft Map or Maps of the Proposed Boundaries of the Districts. Staff Recommendation: The City Manager will open the public hearing and direct National Demographic Corporation to provide a presentation and explanation of the districting process, public input will be encouraged and received regarding the composition of the districts, and the public hearing will be closed. (The first City Council public hearing on the District Maps and Sequencing is scheduled for a special meeting on January 23, 2019, at 6:30 p.m.)

City Manager Troy Brown opened the public hearing.

Ms. Benson introduced demographer Robert McIntyre of National Demographics.

Mr. McIntyre stated he will be discussing communities of interest; how maps are drawn; the legal qualifications for drawing the maps; and will introduce three tools for drawing the maps. He provided a PowerPoint presentation on the California Voting Rights Act and explained why the City has initiated this process to move to district-based elections; the required time frame for accomplishing this; the requirements of state and federal law; and the tools the City of Moorpark has available on its website for residents to draw their own district maps to present to the City for consideration.

Mr. McIntyre explained that draft maps need to be submitted before or by January 16, 2019. These maps will be reviewed at the special City Council meeting on January 23, 2019.

Mr. McIntyre demonstrated how to draw maps using the tools on the City's website and emphasized the goal of drawing maps based on communities of interest and essential population numbers for each district based on the 2010 Census.

Six members of the community spoke during the public hearing, and included comments on the creation of more than four districts; having an elected Mayor versus an appointed Mayor; and avoiding gerrymandering districts to accommodate existing Councilmembers who live close to each other. Mr. McIntyre responded by providing additional clarification on the process for drawing districts and referred to the City Attorney for response to comments on creating more than four districts.

City Attorney Kevin Ennis stated that maps of five districts or more may be submitted, as no decision on the number of districts has been made. He clarified that the City Council did initiate a process to convert from the at-large Council election system to a district-based system with four districts and an elected Mayor. Mr. McIntyre stated that the percentage of cities in Ventura County that have adopted five districts with an appointed Mayor as opposed to four districts with an elected Mayor is about 50/50.

Mr. Ennis explained that Measure D adopted by the Moorpark voters in 1988 required a directly elected Mayor, which is still currently in force. He went on to state the City Council can overturn this Measure due to a California State statute enacted in 2016 and effective in January 2017 that allows the Council in the context of trying to bring their electoral process into compliance with the California Voting Rights Act to approve, without going to the voters, to have five, seven, or nine districts; or four, six or eight districts with a directly elected Mayor.

Mr. McIntyre further demonstrated the mapping tools on the City's website at www.moorparkca.gov/districts and stated tools for creating five districts will be added to the website.

In response to one speaker's concerns that the community of Moorpark Highlands has been divided on the website map, Mr. McIntyre assured that if they do not receive a map showing that area as a community of interest, they will create a map that does; and in response to another request he said they would add data online to indicate how many units have been occupied since the last census date.

Mr. Brown closed the public hearing and reminded the public of the special City Council meeting on January 23, 2019.

4. ADJOURNMENT:

The meeting adjourned at 8:18 p.m.

Troy Brown, City Manager

ATTEST:

Maureen Benson, City Clerk
